

AUSTRALIAN TANKS PROJECT CASE STUDY

Client: Hutchisons Builders
Project: Precast Transfer Station
Location: Mackay, Qld

THE CHALLENGE

With stormwater run off from surrounding sites, a rapid install was essential. Combined with budget constraints, a cost efficient solution was required for project maximisation.

THE SOLUTION

- » One (1) single pour precast 25,000L Australian Tank.
- » Supplied fully coated and with pump station installed in one (1) hour and fifteen (15) minutes.

THE RESULT

- » Arrival onsite at 12:05pm
- » Fully installed by 1:20pm
- » Australian Tanks precast alternative with transfer station installed
- » Trafficable by fully loaded semi-trailer
- » Anti floatation

PRODUCTS

- » Australian Tanks 25,000L precast tanks
- » Transfer station installed
- » Fully coated
- » All penetrations, risers and access frames
- » All sealant supplied for installation
- » T44 traffic rated
